2. The following is an examiner's statement of reasons for allowance:

The reference (s) of record do not teach or suggest, either singularly or in combination at least the limitation of "a separately manufactured thermal connecting part disposed in said opening and fastened into said mount part to form an electrical connection with the at least one external electrical connecting strip, said thermal connecting part having at least one chip mounting area and a reflector well surrounding said chip mounting area" for claim 1, "at least one external electrical connecting strip having a surface coating for improving component mounting characteristics; and a separately manufactured thermal connecting part disposed in said opening and fastened into said mount part to form an electrical connection with the at least one external electrical connecting strip, said thermal connecting part having at least one chip mounting area" for claim 13; " a separately manufactured thermal connecting part disposed in said opening and fastened into said mount part to form an electrical connection with the at least one external electrical connecting strip, said thermal connecting part having at least one chip mounting area...the housing is a surface mounted housing having a bearing surface for the surface mounting with the thermal connecting surface extending to the bearing surface for conducting heat to an exterior

surface to which the bearing surface mounts the housing” for claim 17; “a separately manufactured thermal connecting part disposed in the opening of the mounting region and secured to the mounting region to form an electrical connection with the first electrically conductive component, wherein the thermal connecting part comprises at least one chip mounting area and a reflector well surrounding said chip mounting area, and wherein the opening extends completely through the first component and the thermal connecting part extends through the opening in the mounting region and connects to the mounting region at the opening to transfer heat away from the mounting region.” for claim 52; “ a separately manufactured thermal connecting part disposed in said opening and fastened into said mount part to form an electrical connection with the at least one external electrical connecting strip, said thermal connecting part having at least one chip mounting area,...wherein the chip is a semiconductor chip, the radiation permeable compound is a plastic compound, and the radiation-permeable compound has a volume described by the formula $V \propto H$, where H is a height of said chip and q is a scaling factor having a value is less than 10 mm^2 ” for claim 64.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
